

About ASAP Computers

ASAP Computer Services was founded in 1999 after the Managing Member Courtney Pezel, who worked for a SONY subsidiary at the time was laid off. Jobless, gung-ho and on a shoestring budget he started the company that now provides IT services that are customized for each and every client.

Thanks to our customers and their business, this company has grown to where it is today and will continue to grow.

We continue to listen to you.

We put our reputation on the line in regards to your satisfaction, we offer a customer satisfaction guarantee and welcome the opportunity to demonstrate this work ethic to you.
